

WYPALL* Microfibre Cloths with MICROBAN® Antimicrobial Product Protection

Efficient & hygienic cleaning solution

WYPALL*
BRAND

WYPALL* Microfibre Cloths

Wiping Solutions

Efficient & hygienic cleaning solution for hotels and office buildings.

WYPALL* Microfibre Cloths with MICROBAN® Antimicrobial Product Protection are designed with the cleaning professional in mind. WYPALL* Microfibre Cloths help you to clean smarter, while inhibiting the growth of stain and odour-causing bacteria on the cloths. They are also environmentally friendly cleaning options that can be used without chemicals.

Improves cleaning efficiency

- Enhances cleaning efficiency by the lift and trap method of cleaning surfaces.
- The super smooth texture of the green WYPALL* Microfibre Cloth is especially designed for glass and mirror cleaning, ensuring low streaking on high shine surfaces e.g. metal banisters, windows and mirrors.
- Allows a faster turnaround of guest rooms and offices, an important measure of efficiency.
- Remarkably absorbent – able to hold up to 8 times their weight in liquid.

Reduces cross contamination

- Available in 4 colours, enabling task segregation and helping to prevent cross contamination when cleaning e.g. cleaning bathroom surfaces vs cleaning guest rooms or offices.

Reduces chemical usage

- Helps inhibit the growth of odour causing bacteria on the cloths, limiting the use of cleaning chemicals.
- Able to be washed up to 300 times reducing waste.
- Provides a viable environmentally friendly cleaning option, at the same time as further reducing your costs.

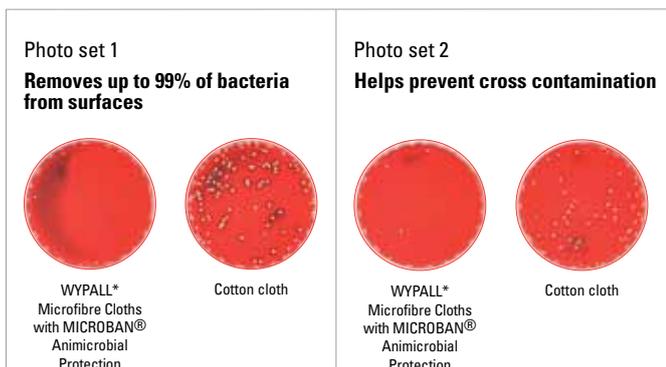

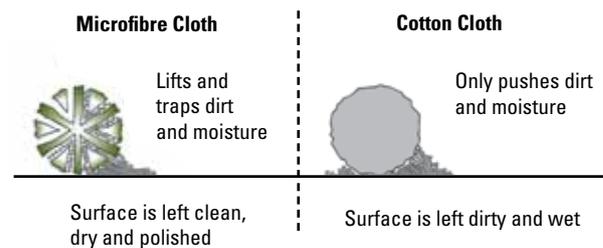

How do Microfibre Cloths work?

Microfibre material is made by splitting fibres into tiny pieces and knitting them into a super-cleaning cloth that effectively traps soil and absorbs liquid for a streak-free shine. WYPALL* Microfibre Cloths with MICROBAN® Antimicrobial Product Protection, when dampened with water, physically remove up to 99% of bacteria from non-porous surfaces.

Not all Microfibres are the same

The cloth's performance is related to the number and thickness of the fibres. The thinner the fibre, the more fibres per cloth - the better! **WYPALL* Microfibre Cloths have been developed with more split fibres than other microfibre cloths.** The split fibres are required to achieve more effective cleaning power and reduce the use of chemicals by lifting and trapping dirt. Without split fibres, microfibre cloths clean just like cotton cloths.

Greatly increased cleaning power

How does the mechanical action of the cloth work?

This photography shows the effectiveness of WYPALL* Microfibre Cloths with MICROBAN® Antimicrobial Product Protection in removing bacteria from a surface in comparison with a common cotton cloth. The white dots in the dish are actual bacteria left behind on a surface wiped with WYPALL* Microfibre Cloths with MICROBAN® Antimicrobial Product Protection and a common cotton cloth. The first photo set shows the results of the mechanical action of the cloth removing bacteria from the surface. The second photo set shows the results of the mechanical action of the cloth holding the bacteria and preventing the bacteria from being transferred to another surface.

How does MICROBAN® Antimicrobial Product Protection work?

When bacteria come in contact with the cloth, MICROBAN® Antimicrobial Product Protection penetrates the cell wall of the microorganism, disrupting cell functions and making it unable to function, grow and reproduce.

Efficient & hygienic cleaning solution

- the cloth lifts and traps dirt from surfaces for fast and efficient cleaning
- no chemicals required – helps reduce annual cleaning cost
- absorbs & retains up to 8 times its weight in liquid – efficient cleaning
- can be washed up to 300 times for better cost control
- available in 4 different colours - enables task segregation and helps to reduce cross contamination
- green cloth has smooth texture for glass and mirror cleaning

WYPALL* MICROFIBRE CLOTHS				
Description	Code No.	Colour	Case Contents	Sheet Size
WYPALL* MICROFIBRE CLOTHS with MICROBAN® Antimicrobial Product Protection	83610	Yellow	4  x 6  =24	(40cm x 40cm)
WYPALL* MICROFIBRE CLOTHS with MICROBAN® Antimicrobial Product Protection	83620	Blue	4  x 6  =24	(40cm x 40cm)
WYPALL* MICROFIBRE CLOTHS with MICROBAN® Antimicrobial Product Protection	83630	Green	4  x 6  =24	(40cm x 40cm)
WYPALL* MICROFIBRE CLOTHS with MICROBAN® Antimicrobial Product Protection	83980	Red	4  x 6  =24	(40cm x 40cm)

MICROBAN® Antimicrobial Product Protection can be found in leading consumer products from around the world.

From TAUBMANS EASYCOAT brand paint to SANTAS brand linen to BATA brand footwear, many of today's products are protected by the leading antimicrobial solutions technology, MICROBAN® Antimicrobial Product Protection. WYPALL* Wipers and MICROBAN® Antimicrobial Product Protection are two trusted brands with strong performance reputations. Through this unique partnership, WYPALL* Microfibre Cloths bring innovative cleaning solutions to the marketplace, as the only microfibre cloth with MICROBAN® Antimicrobial Product Protection.

SUPPORT & QUALITY GUARANTEED

Guarantee of satisfaction

Our 'no-quibble' guarantee, covering all Kimberly-Clark Professional Products, assures you of trouble-free performance by our recommended systems. The quality and consistency of our products allows us to offer a money-back or replacement of stock guarantee.

Guaranteed support

We are proud of our after sales service. Our national network of distributors and sales representatives are on hand when you need them, the answer to any query you may have is just a phone call away.
